--- SEE OFFICE ACTION ON THE FOLLOWING PAGES ---

Art Unit: 1742

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-26 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The term “substantially” found throughout Applicant’s disclosure including claims is not supported so that one of ordinary skill in the art at the time of the invention would understand the limitations of this term.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1742

The term "substantially" found within the claims is not definite in that one of ordinary skill in the art could not reasonably ascertain the limitation of the term.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure as general background information.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel Jenkins whose telephone number is (703) 306-4157.
